Ask our community liaisons about how we can reduce rehospitalizations and ER visits while improving patient and care provider satisfaction.

Our Transitional Care Program, places emphasis on the first 30 days after a patient's return home. We focus on setting follow up appointments, providing community resources, and involving the physician before returning home.

We team with leading healthcare professionals to provide ancillary services that will enhance a patient's rehabilitation experience.

Assisteo Home Health, operates a Patient Intelligent Monitoring Center in Phoenix to facilitate care transition, improve medication compliance, and control unnecessary healthcare costs.
